

Needs Assessment Menti Results

Partnership Meeting, October 2024

What are you feeling good about/proud of?

- Connectivity and data capacity
- Creating state action plan
- Community engagement t
- My team
- High response rate on population survey
- Partner involvement
- The thoroughness
- Collecting diverse perspectives
- Great feedback from the people Of our state
- Cross-collaboration
- Much more community engagement than in 2020, and in multiple languages
- Partnership with stakeholders
- Progress
- Statewide listening tour to add context to quant data
- Public Outreach & partner engagement
- Not rushing through it!
- Starting early
- Engagement with partners
- That we've gone around the state!
- Community partners are open and willing to participate
- Engagement of diverse partners.

- Targeted needs from particular groups
- We had a youth listening session this NA for the first time ever!
- We have conducted several focus groups and collected a lot of data and we are ready to select priorities
- Way ahead of where we were 5 years ago!
- Stakeholders
- The amazing team we've built
- The thoroughness of the approach
- The number of partners that have been a part of this process.
- Our great working relationship with our vendor and how great our team is doing leading this process.
- Engaging partners
- Our progress. It's been a journey so far
- The level of engagement with partners. Our first ever tribal led needs assessment.
- Our team's commitment, the pace we're moving at
- Response rate to the survey
- Survey creation
- Lived experience on advisory committee
- Stakeholders
- Strong efforts to hear from as many groups as possible.
- Partner's engagement
- Pivoting quickly to change our priority setting meeting to focus on hurricane response
- The steering committee we have working on the needs assessment.
- Amazing epi team completing data analysis
- The overall process is starting to move along and that says a lot for my region
- Holding in person listening sessions in all areas of the state
- Outreach to Hispanic community
- In the process of selecting our priorities
- Completed the surveys, working on completing focus groups
- Partners
- Building on the work of previous and other needs assessments/community input.
- Partners
- I feel good about our team and the plan we have laid out. I feel good about the partners we have engaged
- We are engaging multilevel partners
- Creating space for curiosity and connection
- The amount of responses to our surveys and focus groups.
- Steering committee
- Our Care Connection clinics really, really support families with CYSHCN!!!! 
- Finding out our next 5 years MCH Priorities
- Hearing from those with lived experience
- Built capacity!

- Engaging our partners/community and using data that is already available.
- We have a title V manager
- Partners
- The wide range of folks we've heard from
- Started our committee and drafted tools
- The data and my team
- We have a plan
- We love the NA
- Partnership
- Reaching families we haven't met before
- Focus groups and survey are done and analyzed.
- Spanish speaking focus group
- Engagement with families
- We are able to rumble through tough conversations to set priorities
- That we are moving along well and on schedule.
- The annual review is completed
- The depth of qualitative data collection and analysis
- Listening sessions
- Very proud of our team and partners for their work so far!
- Listening sessions went well
- Family and provider engagement
- Many languages
- We have a great team!
- The team supporting the process, the diverse methods, the rich data and input.
- Success of our CSHCN Program
- We allocated additional time for action plan development so we are being strategic and diligent with our timeline!
- Broad swath of qualitative and quantitative input
- Initiating the process
- The strength of our team keeps me motivated
- We have meetings scheduled in November to look at data
- Great reach
- Collaboration between our state and our family organization (SPAN) from the beginning
- All the great work our team is doing
- We are being diligent with regular meetings every two weeks.
- Engaged over 100 people in our forums and traveled over 1,000 miles to engage our communities
- Identifying stakeholders
- The breadth of information coming in and the extent of reach.
- The organization that we've approached this with
- Joint contract with rural health program on maternal health
- Appreciative inquiry

- Feeling about having a contractor conducting our Needs Assessment.
- Building on our momentum and partnerships
- Team leading the work. Potential.
- Pretty good. We are simultaneously engaging stakeholders and gathering feedback and we build out our priorities.
- We are moving fast now
- We're off to a great start! Great input from families/youth and advisory teams on initial surveys.
- Engaging partners
- We have a steering committee. We are being intentional about getting all voices to the table.
- Our pace seems good
- Starting early and be almost done the first trimester of 2025
- The process
- Doing in the right time of the timeline.
- Proud of the steering committee we have put together and the progress made.
- Feeling good about having a contractor conducting our Needs Assessment.
- We conducted a full state needs assessment from local MCAH and a Systems Capacity Assessment of CYSHCN and are interweaving in state epi data to build out our strategies and priorities.
- Community outreach, survey in multiple languages and available with audio.
- Current partnerships and available population data

What are the barriers/challenges you are facing?

- NPM alignment
- Working with contracted university
- Time and competing priorities
- Low response rate from survey
- Leadership understanding the importance and giving staff freedom and time to do it well.
- We are right on track
- Collective decision making is messy
- Red tape preventing us from moving quicker
- Bots and organizational logistics
- Wanting even more input but need no to stay on timeline
- Narrowing down solutions that are within scope of Title V for big system problems
- Getting stuck on wording of priorities
- Timeline
- Increasing available data outside of FAD
- Managing scope
- Locations

- Genuine family engagement has been difficult. Lots of bots
- Personnel resources
- Engaging partners
- Low response rates among minority populations
- Time
- Ability to create time and maintain competing priorities.
- Difficulty recruiting for perinatal focus groups
- The usual limited time and human resources
- Need ongoing engagement versus once every five years
- People don't trust our local health departments OR know about their services
- Redirection of NA plan
- Collecting data
- Engaging partners
- Prepare on how to interact with other partners.
- Staffing
- Having enough time and bandwidth to complete the needs assessment
- Time
- Staffing
- Recruiting focus group
- Moving into priority selection—gotta jump into the next step
- Lack of Native connections
- Staffing
- Need more time
- So much need - so little time and money
- Many many needs
- Communication
- New team doing NA
- Survey bots
- Resources and funding
- Engaging youth.
- Time/capacity
- Constraint in resources
