

Questions for Youth Listening Sessions on Youth Health Surveys

Prompt: You all have a copy of the 2017 11th grade Oregon Healthy Teens and a copy of the 2018 11th grade Student Wellness Survey in front of you. Before we start, I'm going to take a few minutes and go over the survey(s) briefly so everyone can see which topic areas are covered and what the questions look like. Again, remember you do not have to answer any question you don't want to.

1. Have you ever taken the Oregon Healthy Teens Survey or the School Wellness Survey?
 - a. If so, did you feel any pressure to complete it?
 - b. Were you provided with any sort of resource list after completion?
 - c. Did you have any worries about your survey truly being anonymous after you submitted it to your teacher?
2. Which topic areas (from the surveys) are most important to young people in describing their health?
3. Which topic areas do we ask too many questions about? Which do we not ask enough about?
[Follow-ups – discussion on why they think certain areas need fewer/more questions]
4. What subjects/questions do you think are missing from the surveys? What affects young people's health or how young people feel that is not asked about in the surveys?
5. Are there any particular questions that are confusing?
6. What else do you want people to know about your health and the health of your peers (throughout state)?
